

# Captiva

## Erosion Prevention District

Dear Captiva Residents and Business owners,

### **WHY ROPE AND POSTS?**

#### **“FREQUENTLY ASKED QUESTIONS (FAQ)”**

**1. Why do we need them?-** As part of the recent CEPD beach nourishment project, the final piece to finish was adding the ropes and posts to protect the newly planted dune vegetation. The ropes and poles were placed seaward of the erosion control line and not on private property. Please remember to be mindful of our dunes when you visit Captiva.

#### **2. Why are the posts so tall and the ropes so tight?-**

The FDEP requires taller posts so that the ropes won't sag below the three-foot requirement to keep clear under the ropes for sea turtle nesting. We are looking into aesthetic changes on the way the ropes are structured and can make changes.

#### **3. What if I don't want them or what if I do want them?-** Please complete our survey
